SECUNORM HANDY MDP NO. 447

Original size

Can be metal detected

A cutting tool, or parts of it, can get lost while working. But only for a short while. Because the plastic that can be detected by a metal detector ensures you can find it again quickly.

No paint

You want to avoid risks wherever possible in your job? That's understandable. A handle without paint minimises the risk of contamination in the production process. No bits of paint can flake off and go where it shouldn't.

4-cutting edge blades

Why do you get more out of your stainless steel blade? Because it has four sharp cutting edges. By turning it and turning it over you quadruple the usage time, and cut like new again.

Slider on both sides

With the right hand? With the left hand? It's all the same. Because we have put a slider on to the SECUNORM HANDY MDP that is accessible from both sides. So anyone can work with it!

A classic, in pocket form. Metal detectable.

Don't be deceived by the compactness of this cutter. The SECUNORM HANDY MDP might be small, but it surely can cut. It's a cutting tool with „bite“ and all the qualities required for the job. The MDP version is your first choice if you're coming from either the food or medicine industry. All plastic parts are made from a metal detectable plastic. Coupled with a stainless steel blade, there are no risks with the SECUNORM HANDY MDP.

PRODUCT FEATURES

Technical features

	High safety		Metal detectable
	Tool-less blade change		Abrasion resistant
	Ergonomic		4-times usable blade
	Extended blade length		Cutting depth
	For right and left hander		stainless

Main cutting materials

	Cardboard: up to 2-ply		Wrapping, stretch, and shrink foil
	Tape		Plastic strapping band
	Bagged goods		Layers of foil or paper

Installed blade

NO. 145 0.30 mm, stainless

Application

Safety technology

Automatic blade retraction – a high degree of safety

The automatic blade retraction of the SECUNORM HANDY MDP guarantees a very high degree of safety from cut injuries. As soon as you've started the cut remove your thumb from the slider. The blade will then withdraw back into the handle immediately after leaving the material being cut.

Certificates and awards

YOU CAN FEEL THE QUALITY.
