SECUNORM SMARTCUT MDP

NO. 110700

Original size

Can be metal detected

A cutting tool, or parts of it, can get lost while working. But only for a short while. Because the plastic that can be detected by a metal detector ensures you can find it again quickly.

One way, two advantages

The SECUNORM SMARTCUT MDP is a disposable cutter. What that means for you: no risk of injury when changing the blade. The blade also cannot get lost in the production process.

Slider on both sides

With the right hand? With the left hand? The question does not arise. Because we have put a slider on to the SECUNORM SMARTCUT MDP that is accessible from both sides. Choose for yourself!

Perfect handling

The product does not only look handy. Its small, rounded handle actually fits very well in your hand. What's more: the slider is fitted with grooves so that your thumb doesn't slip.

Yes, a cutting tool can be this SMART.

Metal detectable.

Make one cut with this knife and you'll know immediately why it's called a SMART cut. Its light and compact shape is SMART. The fact that it is suitable for almost all types of cutting material is SMART. What's also smart, is that you can use it in sensitive industries without thinking twice. Because its plastic handle is metal detectable and it has a stainless steel blade. Good to know, isn't it?

PRODUCT FEATURES

Technical features

	High safety		Metal detectable
	Disposable knife		Abrasion resistant
	Very ergonomic		Extended blade length
	Cutting depth		For right and left hander
	Lanyard hole		stainless

Main cutting materials

	Cardboard: up to 2-ply		Wrapping, stretch, and shrink foil
	Tape		Layers of foil or paper
	Yarn, cord		

Installed blade

» The stainless steel blade cannot be changed. Blade thickness 0.63 mm.

Application

Safety technology

Automatic blade retraction – a high degree of safety

The automatic blade retraction of the SECUNORM SMARTCUT MDP guarantees a very high degree of safety from cut injuries. As soon as you have started to cut, take your thumb off the slider. The blade can thus withdraw back into the handle immediately after leaving the material being cut.
